

Remarks

Claims 1-36 are in the application, of which claims 1 and 29 are in independent form. Claims 37-42 were previously cancelled in response to a restriction requirement dated October 6, 2005.

In the January 25, 2006 Office action, claims 1-28 were allowed and claims 29-36 rejected under 35 U.S.C. § 103(a) as being unpatentable over Kesala in view of Pang et al. In the Office action, the examiner kindly indicated that the rejection could be overcome by adding a limitation to claim 29 requiring the filtering step to occur between the supply of precursor material and the reaction space. Applicant thanks the examiner for this suggestion and amends claim 29 as suggested. Claims 30-36 depend from claim 29 and should be allowable therewith.

Claim 11 is amended to correct an inadvertent drafting error identified by the examiner at paragraph 2 of the January 25, 2006 Office action.

Applicant believes the application is now in condition for allowance and respectfully solicits the same. In the event that any further issues are identified, the examiner is invited to contact the undersigned by telephone.

Respectfully submitted,

Planar Systems, Inc.
